Experience

• Frontend Software Developer

Google for Startups

Jun 2022 – Present

- Built reusable components using modern front-end libraries for future use.
- Wrote clean code, suggested technical design and took responsibility for technical delivery.
- Collaborated with the app development team, including the project manager, back-end developers, designers and chief technology officer, to identify problems, test methods, and best practices.
- Optimized components for maximum performance across a vast array of web-capable devices and browsers.
- Examining interface designs and application needs and tracking user interactions on the web.
- Implemented payment methods like Stripe and PayPal.
- Increased performance of the existing application by 20% and decreased the load time by 40 seconds.

• Full Stack JavaScript Developer Intern

Gaza Sky Geeks

Jan 2022 – Jun 2022

- Built over 10 semantically structured full stack web applications.
- Applied agile methodologies like SCRUM for project management.
- Maintained a robust system through tests using JavaScript testing frameworks like Jest.

• Full Stack Software Developer

Self-Employed

Sep 2019 - Jan 2022

- Created several small applications using various programming technologies.
- Developed front-end website architecture which includes designing interactive, responsive and dynamic web pages.
